5. The rejection of claims 1-7, 9-14, 19-22 and 29-31 and 34 under 35 U.S.C. 103(a) as being unpatentable over Park et al., U.S. Patent No. 6,271,278 (hereinafter "Park") is withdrawn.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1713

7. Amended claims and new claims filed on 09/25/05 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims have been amended to include the following: a second monomer copolymerized with said monomer to impart water insolubility to said first polymer. Please pinpoint in the specification support for the amended and new claims.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The present invention covers a water-insoluble interpenetrating polymer network. Interpenetrating polymer

Art Unit: 1713

networks are well known and defined as a combination of two polymers, each in network form, at least one of which has been synthesized and/or cross-linked in the presence of the other. The limitations in the claim contradict the commonly accepted definition for Interpenetrating polymer networks, primarily a second polymer polymerized independently of said first polymer. Please provide an explanation. Does this invention pertain to interpenetrating polymer networks.
